nazar added a comment to [T10552: Update ziglang to >= 0.10.1](#).

properly working zig wasnt included with recent sync to shannon (stable), but can be installed from unstable (testing) repo

```
sudo eopkg install https://cdn.getsol.us/repo/unstable/z/zig/zig-0.10.1-5-1-x86_64.eopkg
```

that should be fixed with next weekly sync from unstable to stable.

We ran into known issue, here's the root cause

<https://github.com/ziglang/zig/blob/d27007cd7e66df8db72cfaa7e5dcd3de65857ac8/CMakeLists.txt#L120>

⚙ Jun 11 2023, 4:29 PM

nazar added a comment to [D14197: unbork zig compiler](#).

In D14197#243628, @silke wrote:

This does not fix the issue with `ncdu` for me. It looks to me like zig uses instructions from the build environment, and it probably shouldn't.

I can reproduce the issue as follows:

1. Build zig on a machine with AVX512 (like the buildserver or my desktop).
2. Transfer and install package on a machine without AVX512.
3. Run `zig` and get a crash with 'Illegal instruction'.

📅 Aug 28 2022

nazar added a comment to D13525: update zotero to 6.0.13.

There was github issue where developer suggested building from git source and not from branch tag, that is why all three sources point to git source rather then to tar.gz. Also some directory wrangling I do is because solbuild fetches single source, while zotero has three repositories. package.xml follows instructions available from [official wiki](#)

📅 Mar 14 2022

nazar updated subscribers of T10195: omemo-gajim plugin.

@livingsilver94 removed python-axolotl dependency from gajim, because it isn't in requirements.txt

@algent noticed python-axolotl package is orphaned

@nazar will provide patch for gajim-omemo. The plugin rdeps are python-axolotl and gajim, so there's no orphaned package anymore and gajim rdeps already have been fixed.

⚓ Mar 14 2022, 17:34 · Package Requests

no static files

Jan 31 2022, 16:14

nazar added a comment to D12716: initial inclusion of zim-tools.

oh, this one patch is marked WorkInProgress [WIP] in title, this patch will get all expected files after libzim and docept.cpp had been accepted, since zim-tools depends on these packages to be built and tested first. So pleas ignore this one patch for now.

Jan 31 2022, 15:57

nazar added a comment to D12712: initial inclusion of RHVoice.

@Girtablulu, rhvoice.conf in /usr/share/defaults is file for integration with speech-dispatcher, not for rhvoice itself. While speech-dispatcher has been patched to be stateless, rhvoice didn't. So far rhvoice expects its config at /etc/RHVoice/RHVoice.conf as designed. So these two files have different purpose.

set build_type to RelWithDebug

⚙ Jan 26 2022, 16:41

nazar added a comment to T10134: Kodi.

I'd like to step in as a kodi maintainer, my arguments are

- both Solus and kodi are past Python2 EOL phase, so things should be back to normal
- I'll provide slimmed down but still fully capable kodi build
- Package will include necessary binary addons along with Retroplayer
- Retroplayer will get Solus edge over other desktop distros making it viable HTPC OS.

⚙️ Jan 23 2022, 14:49

nazar added a comment to T9917: Update Kodi to 19.1.

@Girtablulu, weren't complaints related to Python2 EOL? Since both solus and kodi projects are past that phase, thing should be back to normal, my own experience tells me it is doable: e.g. here is binary eopkg I built with updated patch <https://send.vi.ee/download/d779a5614e140919/#s01YpmCd45OmLOhpDP8bg>

⌚ Jan 23 2022, 14:15 · Software, Package Requests

@Girtablulu absolutely! pls, get me the repo I could use.

⚓ Jan 16 2022, 19:18 · Software, Package Requests

nazar added a comment to T10103: Package Request: Thunar.

do you know a way to work around my problems with it? (borders, multiple instances, window buttons)

I'd check if icon theme is installed first. Only change I have is I assign floating class with i3/config

⚓ Jan 16 2022, 19:14 · Package Requests

nazar added a comment to T8572: ISO installer - LUKS, swap-size.

@g66925 rn there's no control over swapsize during install phase, but you can control swappiness parameter during run-time

⚓ Jan 16 2022, 09:48 · Installation

nazar added a comment to T8902: Power button does not perform Power Off action.

Multiple reports confirm this is not hardware specific issue, but configuration issue. And while I cannot offer a fix, there's a workaround to handle power button with systemd

⚓ Jan 16 2022, 09:37 · Software

nazar added a comment to T5153: Lynis Security Auditing Tool.

@Adrian-Turjak from what I know lynis interacts with apt-get but not with eopkg, it is lacking in this regard and may confuse users. Upstream has to support eopkg for this package to be candidate for inclusion.

nazar added a comment to [T9089: How hard could it be? Move everything off of JDK8.](#)

right now openjdk-8 reverse dependencies are jitsi and icedtea-web, the rest builds with openjdk-11. [There are reports](#) jitsi 2.11 runs on openjdk-11 and icedtea-web has no reverse dependencies in solus repo at all.

- Would `javac --source=8` patch to project files help building above packages with openjdk-11?
- Can icedtea-web package be obsoleted to unblock progress with this ticket?

Jan 15 2022

nazar added a comment to [T4617: Solus Mate: Hibernate Not Working.](#)

In Solus3 era I experienced a bug with Live USB install where setup program would fail to initialize swap partition, and this partition is where memory content is "hibernated". To make hibernate work I had to do one time fix: `swapon` and add kernel parameter `resume=UUID=swap-partition-uuid`. [@mate-user](#), If your install is that old root cause of your problem may well be missing/unused swap partition, like I used to have. If you never fixed swap partition manually, fresh install of Solus4 will definitely help.

⚙ Jan 14 2022, 21:24

nazar added a comment to T10103: Package Request: Thunar.

Xfce is not packaged for Solus like at all, but there's MATE which may be worth for you to try. Also, I use nautilus with i3wm without problems.

⚓ Jan 14 2022, 20:17 · Package Requests

nazar added a comment to T9800: Battery drain in Solus is much worse than it should have been.

@xulongwu4 since hardware you use is quite recent, did the situation improve with 5.14 kernel? Also is it possible Fedora/Ubuntu installer sets up TLP without user knowing?

⚓ Jan 14 2022, 20:09 · Hardware

nazar added a comment to T10045: Update Emacs to 28.X and enable --with-native-compilation.

@lf-araujo , I believe this is very same upstream as GNU Emacs, and the latter is already packaged. And since gcemacs has been merged into 28.0 branch after T9679 is resolved and package updated to 28.1 you're all set. So maybe change title to "Update emacs package to 28.1" It's tad too soon, but it's happening: pretest is at 28.0.91 right now.
